INDEPENDENT AUDITOR'S REPORT

To Shareholders and Management of Brooklyn-Kiev Group:

Report on the Audit of the Consolidated Financial Statements

Opinion

We have audited the consolidated financial statements of Limited Liability Company "Brooklyn-Kiev" and its subsidiaries (the "Group"), which comprise the consolidated statement of financial position as of 31 December 2019, and the consolidated statement of profit or loss and other comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as of 31 December 2019, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards ("IFRSs") and the preparation of the financial statements requirements of the Law of Ukraine "On accounting and financial reporting in Ukraine" ("Law on accounting and financial reporting").

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing ("ISAs"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' *Code of Ethics for Professional Accountants* (the "IESBA Code") together with the ethical requirements that are relevant to our audit of the financial statements in Ukraine, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. The matter below was addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on this matter.

Why the matter was determined to be a key audit matter

Compliance with covenants on borrowings and Going Concern

In accordance with terms of agreements for borrowings, the Group should comply with certain financial and non-financial covenants. As of 31 December 2019, the Group has breached a certain bank covenant and reclassified long-term part of debt of UAH 25,254 thousand to short-term borrowings.

How the matter was addressed in the audit

We obtained understanding of the Group's processes relating to monitoring of compliance with the terms of loan agreements and risks related to the Group's ability to continue as a going concern.

We reviewed the terms of loan agreement including the covenants and event of default definition.

Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited ("DTTL"), its global network of member firms, and their related entities. DTTL (also referred to as "Deloitte Global") and each of its member firms are legally separate and independent entities. DTTL does not provide services to clients. Please see www.deloitte.com/about to learn more.

Why the matter was determined to be a key audit matter

Non-compliance with covenants may have a significant impact on the classification of liabilities in the consolidated statement of financial position, on the ability of the Group to settle its obligations in a due course and to continue as a going concern.

Due to the reasons described above we determined compliance with covenants and going concern as a key audit matter.

Refer to notes 3 and 15 in the consolidated financial statements.

How the matter was addressed in the audit

We examined management's calculations of the covenant ratios. We checked mathematical accuracy of covenant calculations and reconciled input data to the data audited by us.

We checked the appropriateness of classification of borrowings as current or non-current liabilities based on the results of analysis of compliance with covenants on relevant loan.

We critically assessed the key assumptions and judgements used in the Group's budget, cash flow forecasts and scenarios affecting the Group's liquidity and its ability to settle obligations, including, the scenario of early repayment of the borrowings.

We reviewed the settlement of borrowings subsequent to the reporting date according to the schedule and support letter provided by the immediate participant to check existence of commitment for prolongation of the borrowing in case of cash flow shortage.

We assessed completeness and adequacy of disclosure of loans and covenants compliance and disclosures in relation to going concern included to the consolidated financial statements.

Other Information

Management is responsible for the other information. The other information comprises the information included in the management report, but does not include the consolidated financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information; we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRSs and Law on accounting and financial reporting, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period, which constitute the key audit matters included herein. We describe these matters in our auditor's report, except for the cases when a law or regulation prohibits a public disclosure of a specific matter or, in extremely adverse circumstances, we determine that such an matter should not be addressed in our report, as negative consequences from such a disclosure may predictably outweigh its usefulness for interests of the public.

Report on Other Legal Requirements

We have been appointed as auditor of the Group by the General Participants' Meeting on 2 September 2019. In view of the previous renewals and reappointments, we conducted audit from 16 July 2012 to the date of this report.

We confirm that the audit opinion is consistent with the additional report to the audit committee.

We confirm that the prohibited non-audited services referred to ISA or requirements of Article 6, paragraph 4 of Law of Ukraine "On Audit of Financial Statements and Audit Activities" were not provided and that the audit engagement partner and audit firm remains independent of the Group in conducting the audit.

Basic Information about Audit Firm

Name: Limited Liability Company "DELOITTE & TOUCHE UKRAINIAN SERVICES COMPANY".

Address of registration and location of audit firm: 48, 50a Zhylianska Str., Kyiv, 01033, Ukraine "Limited Liability Company "Deloitte & Touche Ukrainian Services Company" was enrolled to Sections of "Audit Entities", "Audit Entities and Auditors That Have the Right to Conduct Statutory Audits of Financial Statements", and "Audit Entities and Auditors That Have the Right to Conduct Statutory Audits of Financial Statements of Public Interest Entities" of the Register of Auditors and Auditing Entities of the Audit Chamber of Ukraine under #1973".

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

In Ukrainian Hryvnias and in thousands

1. NATURE OF THE BUSINESS

These consolidated financial statements represent the financial statements of LLC "Brooklyn-Kiev" and its subsidiaries, LLC "Treksim" and "Odessa port operator" Ltd (hereinafter, the "Group").

LLC "Brooklyn-Kiev" (the "Company") is a limited liability company incorporated in accordance with the laws of Ukraine.

The Group's business activities are carried out on the basis of stevedoring complex #5 located in Khlibna Harbor of the Odessa Sea Commercial Port. LLC "Brooklyn-Kiev" renders stevedoring services related to cargo handling, carries out stuffing and unstuffing of containers and provides cargo storage on the customs territory of the Odessa Sea Commercial Port.

The Group is in the process of constructing a grain terminal with the annual cargo turnover of up to 4.5 million tons on the rented land. The projected construction costs were estimated at the start of the project at about USD 103,800 thousand. Phase 1 of the grain terminal construction was put into operation in December 2013. Phases 3 and 4 were put into operation in February and November 2016 respectively and phases 2 and 5 are planned to be put into operation by the end of 2020.

The Group's registered and actual address is: Khlibna Gavan Str., 6, Odessa, 65003, Ukraine.

As of 31 December 2019 and 31 December 2018 principal activities of subsidiaries and the Group's ownership interest in it were as follows:

			Group's effective ownership interest as of		
Subsidiary	Principal activity	Country of incorporation	31 December 2019	31 December 2018	
"Odessa port operator" Ltd LLC "Treksim"	Transportation support activities Cargo handling	Ukraine Ukraine	100% 100%	100%	

In March 2019 the Company has acquired 100% interest in Treksim LLC, a stevedore company engaged in storage and transhipment of cargo, for a total consideration of UAH 500 thousand.

2. OPERATING ENVIRONMENT

Since 2016, the Ukrainian economy has demonstrated signs of stabilization after years of political and economic tension. In 2019, the Ukrainian economy continued its recovery and achieved real GDP growth of around 3.6% (2018: 3.3%), modest annual inflation of 4.1% (2018: 9.8%), and stabilization of the national currency (appreciation of the national currency by around 5% to USD and 11% to EUR comparing to previous year averages).

Ukraine continues to limit its political and economic ties with Russia, given annexation of Crimea, an autonomous republic of Ukraine, and an armed conflict with separatists continued in certain parts of Luhanska and Donetska regions. As a result of this, the Ukrainian economy is refocusing on the European Union (the "EU") market by realizing potentials of established Deep and Comprehensive Free Trade Area with the EU.

To further facilitate business activities in Ukraine, the National Bank of Ukraine (the "NBU") starting from 20 June 2019 has lifted the surrender requirement for foreign currency proceeds, cancelled all limits on repatriation of dividends since July 2019 and gradually decreased its discount rate for the first time during the recent two years, from 18.0% in April 2019 to 11.0% in January 2020 with further decrease to 6.0% in June 2020.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

In Ukrainian Hryvnias and in thousands

The degree of macroeconomic uncertainty in Ukraine in 2019 still remains high due to a significant amount of public debt scheduled for repayment in 2019-2020, which requires mobilizing substantial domestic and external financing in an increasingly challenging financing environment for emerging markets. At the same time, Ukraine has passed through the period of presidential and parliamentary elections. All newly elected authorities have demonstrated their commitment to introduce reforms in order to boost economic growth, while maintaining macro-fiscal stability and liberalizing economic environment. These changes have resulted in, inter alia, improved Fitch's rating of Ukraine's Long-Term Foreign- and Local-Currency Issuer Default Ratings from "B-" to "B", with a positive outlook. Further economic growth depends, to a large extent, upon success of the Ukrainian government in realization of planned structural reforms and effective cooperation with the International Monetary Fund (the "IMF").

In addition to that, starting from early 2020 a new coronavirus disease (COVID-19) has begun rapidly spreading all over the world resulting in announcement of the pandemic status by the World Health Organization in March 2020. Responses put in place by many countries to contain the spread of COVID-19 are resulting in significant operational disruption for many companies and have significant impact on global financial markets. As the situation is rapidly evolving it may have a significant effect on business of many companies across a wide range of sectors, including, but not limited to such impacts as disruption of business operations as a result of interruption of production or closure of facilities, supply chain disruptions, quarantines of personnel, reduced demand and difficulties in raising financing. In addition, the Group may face the increasingly broad effects of COVID-19 as a result of its negative impact on the global economy and major financial markets.

The significance of the effect of COVID-19 on the Group's business largely depends on the duration and the incidence of the pandemic effects on the world and Ukrainian economy.

3. BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES

Statement of compliance

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") and the preparation of the financial statements requirements of the Law of Ukraine "On accounting and financial reporting in Ukraine" ("Law on accounting and financial reporting").

Basis of preparation

These consolidated financial statements have been prepared on the assumption that the Group is a going concern, which contemplates the realization of the Group's assets and the settlement of the Group's liabilities in the normal course of business.

However, as of 31 December 2019, the Group's current liabilities (UAH 346,821 thousand) exceed current assets (UAH 103,129 thousand) by UAH 243,692 thousand (31 December 2018: by UAH 238,886 thousand), from which UAH 25,254 thousand was reclassified from non-current portion due to breach of a certain bank covenant, that led to loan being repayable on demand. Therefore, the going concern assumption are to be carefully assessed by management to ensure the Group has sufficient funding for its business.

Management believes that preparation of the consolidated financial statements on a going concern basis is appropriate due to the following factors:

Current liabilities as of 31 December 2019 amounted to UAH 346,821 thousand and were mainly related to the current borrowings from third parties in amount of UAH 106,668 thousand:
 UAH 105,464 thousand of principal amount and interest accrued of UAH 1,204 thousand.

 Subsequently to the reporting date, the Group settled UAH 40,670 thousand of principal amount and interest accrued of UAH 4,863 thousand according to the schedule.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

In Ukrainian Hryvnias and in thousands

- Subsequent to the reporting date the Group has received a supporting letter from its immediate
 participant stating that borrowings amounted to UAH 34,134 thousand (including UAH 5,711
 thousand of current debt) and payables for property, plant and equipment due to the participant
 amounted to UAH 34,629 thousand would not be requested to pay and prolonged in case of cash
 flow shortage.
- As of 31 December 2019, the Group had undrawn short-term credit lines amounted UAH 33,082 thousand, including UAH 12,785 thousand from related parties. As at 31 December 2019, undrawn long-term credit lines from related party amounted to UAH 130,274 thousand.
- Phases 2 (completion of the initial project) are planned to be put into operation by the end of 2020. Phase 5 was put into operation in June 2020. Major part of capital expenditures was already incurred as at 31 December 2019 and does not require further significant investments. It is expected, that this will significantly increase a cargo throughput and Group's revenue.
- In accordance to the budget, the Group expects to generate net profit excluding foreign
 exchange loss and finance income/expenses for the year ended 31 December 2020 (unaudited)
 amounted to UAH 171,198 thousand. Net profit excluding foreign exchange loss and finance
 income/expenses for the 1Q 2020 period ended 31 March 2020 (unaudited) amounted to
 UAH 49,518 thousand, that is higher, than budgeted amount for 1Q 2020 amounted to
 UAH 42,762 thousand.

These consolidated financial statements of the Group are prepared on the historical cost basis, except for certain financial instruments that are measured at revalued amounts or fair values at the end of each reporting period, as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these consolidated financial statements is determined on such a basis, except for leasing transactions that are within the scope of IFRS 16, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in IAS 2 or value in use in IAS 36.

In addition, for financial reporting purposes, fair value measurements are categorized into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

The Group's financial assets are represented by the category of "loans and receivables" and carried at amortized cost. Such financial assets are not traded in the active market and, due to their short-term nature, their fair value is estimated to be equal to their carrying amounts as of 31 December 2019 and 2018.

The Group's financial liabilities are represented by the category of "other financial liabilities" and carried at amortized cost.

Trade accounts payable and other current liabilities are, as a rule, of short-term nature and the Group's management estimates their fair value to be equal to their carrying amounts as of 31 December 2019 and 2018.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

In Ukrainian Hryvnias and in thousands

The fair value of loans was estimated by discounting the estimated cash outflows at market interest rates. Management believes that the fair value of loans as of 31 December 2019 and 2018 approximates their carrying values.

To measure the fair values of the Group's financial assets (except of cash and cash equivalents, which is level 2 of fair value hierarchy) and financial liabilities, inputs of Level 3 were used.

Adoption of new and revised International Financial Reporting Standards

The Group applied IFRS 16 Leases for the first time. The nature and the effect of these changes are disclosed below.

IFRS 16 superseded IAS 17 Leases, IFRIC 4 Determining whether an Arrangement Contains a Lease, SIC-15 Operating Leases-Incentives and SIC-27 Evaluating the Substance of Transactions Involving the Legal Form of a Lease. The standard sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single onbalance sheet model. It introduces significant changes to lessee accounting by removing the distinction between operating and finance lease and requiring the recognition of a right-of-use asset and a lease liability at commencement for all leases, except for short-term leases and leases of low value assets when such recognition exemptions are adopted.

Lessor accounting under IFRS 16 is substantially unchanged under IAS 17. Lessors will continue to classify leases as either operating or finance leases using similar principles as in IAS 17. Therefore, IFRS 16 did not have an impact for leases where the Group is the lessor.

The Group adopted IFRS 16 using cumulative catch-up approach of adoption with the date of initial application of 1 January 2019. Under this method, the standard is applied retrospectively with the cumulative effect of initially applying the standard recognized at the date of initial application.

The Group elected to use the transition practical expedient allowing the standard to be applied only to contracts that were previously identified as leases applying IAS 17 and IFRIC 4 and not to reassess whether a contract is, or contains, a lease at the date of initial application.

The effect of adoption IFRS 16 as at 1 January 2019 (increase/(decrease)) is as follows:

	1 January 2019
Assets	
Right-of-use assets Prepayments to suppliers and other current assets	387,529 (15,096)
Total assets	372,433
Liabilities	
Long-term lease liabilities Short-term lease liabilities	292,235 80,198
Total liabilities	372,433

Nature of the effect of adoption of IFRS 16

The Group has lease contracts for land plots. Before the adoption of IFRS 16, the Group classified each of its leases (as lessee) at the inception date as an operating lease. The leased items were not capitalized, and the lease payments were recognized as rent expense in profit or loss on a straight-line basis over the lease term. Any prepaid rent were recognized under Prepayments to suppliers and other current assets.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

In Ukrainian Hryvnias and in thousands

Upon adoption of IFRS 16, the Group applied a single recognition and measurement approach for all leases. The standard provides specific transition requirements and practical expedients, which has been applied by the Group.

Leases previously accounted for as operating leases

The Group recognized right-of-use assets and lease liabilities for those leases previously classified as operating leases. The right-of-use assets were recognized based on the amount equal to the lease liabilities, adjusted for any related prepaid and accrued lease payments previously recognized. Lease liabilities were recognized based on the present value of the remaining lease payments, discounted using the incremental borrowing rate at the date of initial application.

The weighted average incremental borrowing rate applied to the lease liabilities as at 1 January 2019 was 15.06%. The average lease term is 12 years.

The Group also applied the available practical expedients wherein it:

- Used a single discount rate to a portfolio of leases with reasonably similar characteristics;
- Relied on its assessment of whether leases are onerous immediately before the date of initial application;
- Excluded the initial direct costs from the measurement of the right-of-use asset at the date of initial application.

The lease liabilities as at 1 January 2019 can be reconciled to the operating lease commitments as at 31 December 2018 as follows:

Lease liabilities as at 1 January 2019	372,433_
Incremental borrowing rate as at 1 January 2019 Effect of discounting	15.06% (218,961)
Operating lease commitments as at 31 December 2018	591,394

(i) Summary of new accounting policies

Set out below are the new accounting policies of the Group upon adoption of IFRS 16, which have been applied from the date of initial application:

• Right-of-use assets

The Group recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Unless the Group is reasonably certain to obtain ownership of the leased asset at the end of the lease term, the recognized right-of-use assets are depreciated on a straight-line basis over the shorter of its estimated useful life of the underlying assets and the lease term. Right-of-use assets are subject to impairment as non-current non-financial assets under IAS 36 requirements.

• Lease liabilities

At the commencement date of the lease, the Group recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating a lease, if the lease term reflects the Group exercising the option to terminate.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

In Ukrainian Hryvnias and in thousands

The variable lease payments that do not depend on an index or a rate are recognized as expense in the period on which the event or condition that triggers the payment occurs and presented within lease expenses.

In calculating the present value of lease payments, the Group uses the incremental borrowing rate at the lease commencement date if the interest rate implicit in the lease is not readily determinable. Incremental borrowing rate is determined as reference rate adjusted for financing spread of the Group and lease specific. Yield to maturity per Ukrainian government bonds denominated in USD, adjusted for the difference between UAH and USD inflation, is used as reference rate. Group's financing spread is estimated based on the borrowing rates available to the Group for short-term and long-term financing denominated in UAH secured by non-current assets. After the commencement date, the amount of lease liabilities is increased to reflect the unwinding of interest and reduced for the lease payments made.

In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the in-substance fixed lease payments, a change in rate or index to which lease payments are linked.

The Group remeasures the lease liability (and makes a corresponding adjustment to the related right-of-use asset) whenever the lease payments change due to changes in an index or rate or a change in expected payment under a guaranteed residual value, in which cases the lease liability is remeasured by discounting the revised lease payments using an unchanged discount rate (unless the lease payments change is due to a change in a floating interest rate, in which case a revised discount rate is used).

Several other amendments and interpretations listed below apply for the first time in 2019, but do not have a material impact on the consolidated financial statements of the Group:

- IFRIC Interpretation 23 Uncertainty over Income Tax Treatments;
- Amendments to IFRS 9: Prepayment Features with Negative Compensation;
- Amendments to IAS 19: Plan Amendment, Curtailment or Settlement;
- Amendments to IAS 28: Long-term interests in associates and joint ventures;
- Annual Improvements 2015-2017 Cycle (Amendments to IFRS 3, IFRS 11 and IAS 12, IAS 23).

The Group has not yet adopted any standards, interpretations or amendments that have been issued but are not yet effective.

New standards and interpretations issued but not in effect

A number of new Standards, amendments to Standards and Interpretations have been issued but are not yet in effect:

Standards and Interpretations	Effective for annual accounting periods beginning on or after:
Amendments to IFRS 10 Consolidated Financial Statements and	The effective date is not
IAS 28 Investments in Associates and Joint Ventures – Sale or contribution of	determined. Early
assets between an investor and its associate or joint venture	application is allowed.
Amendments to References to the Conceptual Framework in IFRS Standards	1 January 2020
Amendments to IFRS 3 (Oct 2018) – Definition of Business	1 January 2020
Amendments to IAS 1 and IAS 8 (Oct 2018) - Definition of Material	1 January 2020
Amendments to IFR 9, IAS 7 and IFRS 7 – Interest Rate Benchmark Reform	1 January 2020
IFRS 17 Insurance Contracts – Recognition, measurement and disclosure of	
insurance contracts	1 January 2023
Amendments to IAS - 1 Classification of Liabilities as Current or Non-Current	1 January 2022

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

In Ukrainian Hryvnias and in thousands

The Group does not plan to adopt these standards early. Management anticipates that the adoption of these standards will not have a material effect on the consolidated financial statements of the Group in future periods.

Functional and presentation currency

The functional currency of the Group is Ukrainian Hryvnia ("UAH"). Transactions in currencies, other than functional currency of the Group, are treated as transactions in foreign currencies. Monetary assets and liabilities denominated in such currencies are translated at the rates prevailing at the reporting date. All realized and unrealized gains and losses arising on exchange differences are included in consolidated statement of profit or loss and other comprehensive income for the period.

Change in presentation currency

Effective 1 January 2019, the Group changed its presentation currency from US Dollars ("USD") to Ukrainian Hryvnia ("UAH") in order to comply with local legislation.

In order to satisfy the requirements of IAS 21 with respect to a change in presentation currency, the statutory financial information as previously reported for the years ended 31 December 2018 has been restated from USD into UAH using the procedures outlined below:

- Assets and liabilities were translated into UAH at the relevant closing rates of exchange;
- Transactions were translated into UAH at the relevant average rates of exchange;
- The cumulative foreign currency translation reserve was set to nil at 1 January 2019, the date
 of change in presentation currency;
- Share capital, and other reserves were translated at the historic rates prevailing at the dates of transactions; and
- All exchange rates used were extracted from the Group's underlying financial records.

The relevant exchange rates were as follows:

	As of 31 December 2019	Average for the year ended 31 December 2019	As of 31 December 2018	Average for the year ended 31 December 2018
UAH/USD	23.6862	25.8373	27.6883	27.2016
UAH/EUR	26.4220	28.9406	31.7141	32.1341

Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and entities controlled by the Company (its subsidiaries) made up to 31 December each year. Control is achieved when the Company:

- Has the power over the investee;
- Is exposed, or has rights, to variable returns from its involvement with the investee; and
- Has the ability to use its power to affects its returns.

The Company reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

In Ukrainian Hryvnias and in thousands

When the Company has less than a majority of the voting rights of an investee, it considers that it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Company considers all relevant facts and circumstances in assessing whether or not the Company's voting rights in an investee are sufficient to give it power, including:

- The size of the Company's holding of voting rights relative to the size and dispersion of holdings of the other vote holders;
- Potential voting rights held by the Company, other vote holders or other parties;
- Rights arising from other contractual arrangements; and
- Any additional facts and circumstances that indicate that the Company has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made.

Consolidation of a subsidiary begins when the Company obtains control over the subsidiary and ceases when the Company loses control of the subsidiary. Specifically, the results of subsidiaries acquired or disposed of during the year are included in profit or loss from the date the Company gains control until the date when the Company ceases to control the subsidiary.

Where necessary, adjustments are made to the financial statements of subsidiaries to bring the accounting policies used into line with the Group's accounting policies. All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between the members of the Group are eliminated on consolidation.

Revenue recognition

The Group derives its revenue from contracts with customers for the transfer of services over time primarily from the cargo transshipment and personnel and equipment assignment services. Revenue is measured at the fair value of the consideration received or receivable. The Group recognizes revenue when it transfers control of service to a customer.

Revenue from services is recognized in the accounting period in which the services are rendered in proportion to the stage of completion of the transaction at the reporting date. Depending on the nature of the transaction, the stage of completion is assessed by reference to the proportion that cost incurred to the date bear to estimate total cost of the transaction, or services performed to date as percentage of total services to be performed.

Property, plant and equipment

Property, plant and equipment are carried in the statement of financial position at their historical cost, less any accumulated depreciation and accumulated impairment losses. The historical cost of an item of property, plant and equipment comprises (a) its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates; (b) any costs directly attributable to bringing the item to the location and condition necessary for it to be capable of operating in the manner intended by the Group's management; (c) the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which the Group incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than rendering services during that period. The cost of self-constructed assets includes the cost of material, direct labor and an appropriate portion of production overheads. Capitalized costs include major expenditures for improvements and replacements that extend the useful lives of the assets or increase their revenue generating capacity. Repairs and maintenance expenditures that do not meet the foregoing criteria for capitalization are charged to profit and loss when incurred.

Depreciable amount is the cost of the item of property, plant and equipment, less its residual value. The residual value is the estimated amount that the Group would currently obtain from disposal of the item of property, plant and equipment, after deducting the estimated costs of disposal, if the asset was already of the age and in the condition expected at the end of its useful life. Management estimates the residual values of assets to be equal to nil.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

In Ukrainian Hryvnias and in thousands

Depreciation of property, plant and equipment is recognized so as to write off the depreciable amount, less their residual values, over their useful life, using a straight line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis. Useful lives of the groups of property, plant and equipment are as follows:

Buildings and structures	10-50 years
Machinery and equipment	2-20 years
Office equipment and other fixed assets	2-20 years
Vehicles	7-20 years
Leasehold improvements	5-20 years

Properties in the course of construction for production, supply, or administrative purposes are carried at cost, less any recognized impairment losses. Cost includes professional fees and, for qualifying assets, borrowing costs capitalized in accordance with the Group's accounting policies. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

Leasehold improvements are depreciated at a shorter period of useful lives or on expiry dates of the related lease agreements for the premises where such improvements have been made.

Property, plant and equipment constructed or installed on the rented land are depreciated at an expiry dates of the related lease agreements taking into consideration the renewal period of rent and certainty that it will be exercised.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and carrying amount of the asset and is recognized in profit or loss.

Impairment of tangible assets

At the end of each reporting period, the Group reviews the carrying amounts of its tangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the Group estimates recoverable amount of the cash-generating unit to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value, less costs to sell, and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognized immediately in profit or loss.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined if no impairment loss had been recognized for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognized immediately in profit or loss.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

In Ukrainian Hryvnias and in thousands

Taxation

Income tax expense represent the sum of the current and deferred taxes.

Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit as reported in statement of profit or loss and other comprehensive income because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profits. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible differences can be utilized.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to be applied in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Current and deferred taxes for the year are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case the current and deferred tax are also recognized in other comprehensive income or directly in equity, respectively.

Financial instruments

Financial assets and financial liabilities are recognized when the Group becomes a party to the contractual provisions of the particular instrument.

Financial assets and liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition.

Financial assets

Classification of financial assets

The Group classifies financial assets as subsequently measured at amortized cost, fair value through other comprehensive income or fair value through profit or loss on the basis of both:

- (a) The entity's business model for managing the financial assets; and
- (b) The contractual cash flow characteristics of the financial asset.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

In Ukrainian Hryvnias and in thousands

A financial asset is measured at amortized cost if both of the following conditions are met:

- (a) The financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
- (b) The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A financial asset is measured at fair value through other comprehensive income if both of the following conditions are met:

- (a) The financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- (b) The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

By default, all other financial assets are measured subsequently at fair value through profit or loss (FVTPL).

Amortized cost and effective interest method

The effective interest method is a method of calculating the amortized cost of a debt instrument and of allocating interest income over the relevant period.

For financial assets other than purchased or originated credit-impaired financial assets (i.e. assets that are credit-impaired on initial recognition), the effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) excluding expected credit losses, through the expected life of the debt instrument, or, where appropriate, a shorter period, to the gross carrying amount of the debt instrument on initial recognition. For purchased or originated credit-impaired financial assets, a credit-adjusted effective interest rate is calculated by discounting the estimated future cash flows, including expected credit losses, to the amortized cost of the debt instrument on initial recognition.

The amortized cost of a financial asset is the amount at which the financial asset is measured at initial recognition minus the principal repayments, plus the cumulative amortization using the effective interest method of any difference between that initial amount and the maturity amount, adjusted for any loss allowance. The gross carrying amount of a financial asset is the amortized cost of a financial asset before adjusting for any loss allowance.

Financial assets of the Group are mostly presented by cash and cash equivalents, trade accounts receivable, interest-free loans issued.

Impairment of financial assets

The Group recognizes a loss allowance for expected credit losses on by cash and cash equivalents and trade accounts receivable. The amount of expected credit losses is updated at each reporting date to reflect changes in credit risk since initial recognition of the respective financial instrument.

The Group always recognizes lifetime ECL for trade receivables. The expected credit losses on these financial assets are estimated using a provision matrix based on the Group's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current as well as the forecast direction of conditions at the reporting date, including time value of money where appropriate.

For all other financial instruments, the Group recognizes lifetime ECL when there has been a significant increase in credit risk since initial recognition. However, if the credit risk on the financial instrument has not increased significantly since initial recognition, the Group measures the loss allowance for that financial instrument at an amount equal to 12-month ECL.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

In Ukrainian Hryvnias and in thousands

Lifetime ECL represents the expected credit losses that will result from all possible default events over the expected life of a financial instrument. In contrast, 12-month ECL represents the portion of lifetime ECL that is expected to result from default events on a financial instrument that are possible within 12 months after the reporting date.

Significant increase in credit risk

In assessing whether the credit risk on a financial instrument has increased significantly since initial recognition, the Group compares the risk of a default occurring on the financial instrument at the reporting date with the risk of a default occurring on the financial instrument at the date of initial recognition. In making this assessment, the Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort. Forward-looking information considered includes the future prospects of the industries in which the Group's debtors operate, obtained from economic expert reports, financial analysts, governmental bodies, relevant think tanks and other similar organizations, as well as consideration of various external sources of actual and forecast economic information that relate to the Group's core operations.

In particular, the following information is taken into account when assessing whether credit risk has increased significantly since initial recognition:

- An actual or expected significant deterioration in the financial instrument's external (if available) or internal credit rating;
- Significant deterioration in external market indicators of credit risk for a particular financial instrument, e.g. a significant increase in the credit spread, the credit default swap prices for the debtor, or the length of time or the extent to which the fair value of a financial asset has been less than its amortized cost;
- Existing or forecast adverse changes in business, financial or economic conditions that are expected to cause a significant decrease in the debtor's ability to meet its debt obligations;
- An actual or expected significant deterioration in the operating results of the debtor;
- Significant increases in credit risk on other financial instruments of the same debtor;
- An actual or expected significant adverse change in the regulatory, economic, or technological environment of the debtor that results in a significant decrease in the debtor's ability to meet its debt obligation.

Definition of default

The Group considers the following as constituting an event of default for internal credit risk management purposes as historical experience indicates that financial assets that meet either of the following criteria are generally not recoverable:

- When there is a breach of financial covenants by the debtor; or
- Information developed internally or obtained from external sources indicates that the debtor is unlikely to pay its creditors, including the Group, in full (without taking into account any collateral held by the Group);

Irrespective of the above analysis, the Group considers that default has occurred when a financial asset is more than 90 days past due unless the Group has reasonable and supportable information to demonstrate that a more lagging default criterion is more appropriate.

Measurement and recognition of expected credit losses

The measurement of expected credit losses is a function of the probability of default, loss given default (i.e. the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information as described above. As for the exposure at default, for financial assets, this is represented by the assets' gross carrying amount at the reporting date.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

In Ukrainian Hryvnias and in thousands

For financial assets, the expected credit loss is estimated as the difference between all contractual cash flows that are due to the Group in accordance with the contract and all the cash flows that the Group expects to receive, discounted at the original effective interest rate. The Group recognizes an impairment gain or loss in profit or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Loans and receivables (including interest-free loans issued, trade accounts receivable and other current assets) are measured at amortized cost using effective interest rate method, less any impairment.

Interest income is recognized by applying the effective interest rate, except for short-term receivables when the effect of discounting is immaterial.

Cash and cash equivalents

Cash and cash equivalents include deposits with initial maturity of less than three months or deposits on demand, cash on hand, cash on bank accounts and cash in transit.

Derecognition of financial assets

The Group derecognizes a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognizes its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognize the financial asset and also recognizes collateralized borrowings for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognized in other comprehensive income and accumulated in equity is recognized in profit or loss.

Financial liabilities and equity instruments

Debt and equity instruments issued by a Group are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Group are recognized at the proceeds received, net of direct issue costs.

Repurchase of the Group's own equity instruments is recognized and deducted directly in equity. No gain or loss is recognized in profit or loss on the purchase, sale, issue, or cancellation of the Group's own equity instruments.

Financial liabilities

All financial liabilities are recognized initially at fair value plus or minus, in the case of a financial liability not at FVTPL, transaction costs that are directly attributable to the issue of the financial liability.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

In Ukrainian Hryvnias and in thousands

All financial liabilities are measured subsequently at amortised cost using the effective interest method or at FVTPL.

The Group's financial liabilities include trade accounts payable, other current liabilities (Note 16), borrowings (Note 15).

Other financial liabilities

Other financial liabilities (including borrowings, trade accounts payable and other current liabilities) are subsequently measured at amortized cost using the effective interest rate method.

Borrowings

Interest-bearing borrowings are initially measured at fair value, net of transaction costs and subsequently measured at amortized cost using the effective interest rate method.

Borrowing costs directly attributable to the acquisition, construction, or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

All other borrowing costs are recognized in profit or loss in the period in which they are incurred.

Trade accounts payable and other current liabilities

Trade accounts payable and other current liabilities are subsequently measured at amortized cost using the effective interest rate method.

Derecognition of financial liabilities

The Group derecognizes financial liabilities when and only when, the Group's obligations are discharged, cancelled, or they expire. The difference between the carrying amount of the financial liability derecognized and the consideration paid and payable is recognized in profit or loss.

Provisions

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Group will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, the receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

As of 1 January 2019 the Group has adjusted unused vacation provision representing effect within Other movements line in Statement of changes in equity.

Defined contribution state pension plan

The Group pays to the Ukrainian State Pension Fund an amount based on each employee's wages. The Group's cost for these contributions is included in the caption "Payroll and Related Charges". These amounts are expensed when incurred. Amount of these expenses for the years ended 31 December 2019 and 2018 equaled to UAH 44,204 thousand and UAH 39,633 thousand, respectively.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

In Ukrainian Hryvnias and in thousands

Reclassifications

Certain comparative information presented in the financial statements for the year ended 31 December 2018 has been revised in order to achieve comparability with the presentation used in the financial statements for the year ended 31 December 2019.

4. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Group's accounting policies, which are described in Note 3, management is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Key sources of estimation uncertainty

The following are the key assumptions concerning the future and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

(i) Recoverability of property, plant and equipment and right-of-use asset

At each reporting date, the Group assesses whether there is any indication that the recoverable amount of the Group's property, plant and equipment and right-of-use asset has declined below the carrying value.

The recoverable amount is the higher of an asset's fair value, less costs to sell and its value in use.

When such a decline is identified, the carrying amount is reduced to the recoverable amount. The amount of the reduction is recorded in statement of profit or loss and other comprehensive income in the period in which the reduction is identified. If conditions change and management determines that the assets' value has increased, the impairment will be fully or partially reversed. No impairment loss on the Group's property, plant and equipment and right-of-use asset occurred in the year ended 31 December 2019.

Considering the fact, that no indications of impairment were identified during the reporting period and as of the year end, the management does not expect any reasonable changes in recoverable amount of property, plant and equipment and right-of-use asset, which may have significant impact on the consolidated financial statements.

5. REVENUE

Revenue for the years ended 31 December 2019 and 2018 was as follows:

	2019	2018
Revenue from cargo transshipment	630,542	605,535

Amounts recognized in profit or loss were as follows:

Depreciation expense on right-of-use asset 55,2 Interest expense on lease liabilities 56,1 Expense relating to variable lease payments 55	

11. TRADE ACCOUNTS RECEIVABLE

Trade receivables are non-interest bearing and are generally on 10-20 day credit terms.

The Group always measures the allowance for doubtful debt for trade accounts receivable at an amount equal to lifetime expected credit losses.

The expected credit losses on trade accounts receivable are estimated using a provision matrix by reference to past default experience of the debtor and an analysis of the debtor's current financial position, adjusted for factors that are specific to the debtors, general economic conditions of the industry in which the debtors operate and an assessment of both the current as well as the forecast direction of conditions at the reporting date.

The Group writes off a trade accounts receivable when there is information indicating that the debtor is in severe financial difficulty and there is no realistic prospect of recovery, e.g. when the debtor has been placed under liquidation or has entered into bankruptcy proceedings.

As of 31 December 2019 and 2018 amount of trade accounts receivable past due but not impaired comprised UAH 371 thousand and UAH 1,467 thousand, respectively. As of 31 December 2019 and 2018 no additional expected credit loss allowance was accrued.

79% of total accounts receivable are presented by top-3 customers with high credit rating and low risk of default.

As of 31 December 2019 and 2018 trade accounts receivable in the amount of UAH 9,466 thousand and UAH 10,217 thousand, respectively, were used by the Group as a collateral to secure its borrowings (Note 15).

12. PREPAYMENTS TO SUPPLIERS AND OTHER CURRENT ASSETS

As of 31 December 2019 and 2018 prepayments to suppliers and other current assets were as follows:

	31 December 2019	31 December 2018
Prepayments to suppliers (Note 18) Interest-free loans issued (Note 18)	12,098 3,077	10,197 4,162
Other current assets	11,334	14,872
Total	26,509	29,231

As of 31 December 2019 and 2018 there was no allowance in respect prepayments to suppliers and other current assets.

15. BORROWINGS

As of 31 December 2019 and 2018, outstanding borrowings were presented as follows:

	Weighted average effective interest rate	31 December 2019	Weighted average effective interest rate	31 December 2018
Non-current: Unsecured loan from related party, USD-denominated (Note 18)	7.0%	59,215		<u>-</u> _
Total non-current		59,215		
Current: Secured bank loan, USD-denominated Unsecured bank loan, USD-denominated	12.4% 4.75%	75,762 29,702	12.4%	187,450 -
Unsecured loan from related party, EUR-denominated (Note 18) Unsecured bank loan,	8.0%	5,711		-
UAH-denominated Unsecured loan from related party,		-	19.1%	44,308
USD-denominated (Note 18) Interest accrued		3,000	6.0%	27,688 4,043
Total current		114,175		263,489
Total borrowings		173,390		263,489

As of 31 December 2019 and 2018, the maturities of borrowing facilities in accordance with the contractual loan schedules and future accrued interest payments were as follows:

	31 December 2019	31 December 2018
Due within one year Due from one to five years	126,660 68,310	286,490
Total	194,970	286,490

As at 31 December 2019, undrawn short-term credit lines amounted to UAH 33,082 thousand, including UAH 12,785 thousand from related party (as at 31 December 2018: UAH 88,769 thousand, including UAH 83,065 thousand from related party).

As at 31 December 2019, undrawn long-term credit lines from related party amounted to UAH 130,274 thousand.

As of 31 December 2019 and 2018, the Group had to comply with certain financial and non-financial covenants imposed by the lending bank. The key covenants imposed to the Group refer to its financial performance. Among the key non-financial covenants there is a restriction to declare or pay any dividends or make any distribution of share capital till closing of the project and subject to additional conditions after closing, but till the liability on borrowings settled.

As of 31 December 2019 and 2018 the Group has breached a certain bank covenant. The Group did not fulfil the requirement to maintain debt service coverage ratio at the level of 1.25 as at the reporting date. As a result the bank is contractually entitled to request immediate repayment of outstanding loan amount. Respective non-current portion of long-term borrowings in amount of UAH 25,254 thousand was represented as current as of 31 December 2019 (UAH 88,574 thousand as of 31 December 2018).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

In Ukrainian Hryvnias and in thousands

As of 31 December 2019 and 2018, the borrowings were secured by the following assets:

	31 December 2019	31 December 2018
Property, plant and equipment (Note 9)	1,060,554	974,433
Cash in banks (Note 13)	13,139	61,080

Settlements with employees and respective charges	13,318	10,638
Other current liabilities	3,828	3,774
Total	78,808	92,982

17. CONTINGENCIES AND CONTRACTUAL COMMITMENTS

Taxation

Ukraine's tax environment is characterized by complexity in tax administration, arbitrary interpretation by tax authorities of tax laws and regulations that, inter alia, could increase fiscal pressure on taxpayers. Inconsistent application, interpretation, and enforcement of tax laws can lead to litigations resulting in the imposition of additional taxes, penalties, and interest, which could be material.

In 2019, the State's tax policy was amended in order to be in line with OECD guidance for Base Erosion and Profit Shifting (BEPS) prevention.

Ratification of the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting ("MLI")

On 8 August 2019, Ukraine has deposited with the OECD its instrument of ratification of the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting ("Multilateral Convention"). The Multilateral Convention is intended to automatically modify all existing bilateral treaties/conventions for the avoidance of double taxation specified by the signatories to the Multilateral Convention in their notifications to the Depository (OECD).

The main change introduced by the MLI is the Principal Purpose Test ("PPT"). It provides that the benefits of double tax treaties (DTT) must not be applied to the payments to non-residents if the main or one of the main purposes of the transaction turns out to receive such benefits. In practice, this means that tax authorities may challenge application of DTTs by questioning the purpose of incorporation of non-resident legal entity and the nature of payments to such non-resident.

Therefore, application of reduced withholding tax ("WHT") rates and other benefits granted by the DTT may be challenged

Reform bill No. 466-IX

On 16 January 2020, the Ukraine parliament adopted a tax reform bill containing significant proposed changes to the tax legislation, including recommendations under the OECD base erosion and profit shifting (BEPS) project, as well as significant changes to tax administration procedures. Measures in the reform include the introduction of the three-tiered transfer pricing reporting requirements, a new fixed ratio rule that limit the amount of interest expense, general anti-abuse rules (GAAR), new controlled foreign company (CFC) rules, and a mutual agreement procedure (MAP).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

In Ukrainian Hryvnias and in thousands

The new Law No. 466-IX was signed by the President of Ukraine on 21 May 2020 and partially came into force from 23 May 2020. The major changes that may affect the Group's tax position:

Introduction of a GAAR

The tax reform bill would introduce anti-abuse rules, particularly a "business purpose test" in transactions with nonresidents for corporate income tax and transfer pricing purposes. The business purpose test already has been applied by Ukraine's tax authorities as judicial concept, under which deductions are disallowed for expenses in transactions entered into without genuine business reasons. The new law translates the existing practice into domestic law.

Introduction of three-tiered transfer pricing reporting in accordance with BEPS action 13

In addition to a local file, multinational enterprises (MNEs) would be required to prepare a master file and a country-by-country (CbC) report. Proposed revenue thresholds are in line with OECD recommendations (i.e., EUR 50 million for master files and EUR 750 million for CbC reports). The first reporting year for master files and CbC reports would be 2021 (but not earlier than when Ukraine joins the CbCR MCAA).

Repeal of the thin capitalization rules and introduction of a fixed ratio rule under BEPS action 4

The tax reform bill repealed the current thin capitalization rules and introduce a fixed ratio rule. The new rule would apply to transactions with related and unrelated persons (whether or not resident in Ukraine) if the debt is greater than 3.5 times an entity's equity. Debt attributable to all nonresident creditors would be compared with the relevant entity's equity (currently, only debt with related nonresident entities is considered). If the debt-to-equity ratio is exceeded, the relevant entity's deductions for all interest, (and economically equivalent payments) would be limited to 30% of tax EBITDA (rather than the current rule of 50% of financial EBITDA).

Interest expenses above the limit could be carried forward and deductible against corporate income tax. The non-deductible interest may be carried forward indefinitely, but it would be subject to an annual 5 percent disallowance.

30% upward adjustment (increase of taxable base) on sales to residents from low-tax jurisdictions and to fiscally transparent entities Resident companies would be required to increase their taxable base for corporate income tax purposes by 30% of the value of the goods and services sold to residents of low tax jurisdictions and foreign companies having special legal forms (the lists of low tax jurisdiction and fiscally transparent entities are approved by the Government).

Mutual agreement procedure

The MAP for resolving tax disputes under double tax treaties would be introduced into domestic law (current tax laws do not provide for this type of procedure). MAP requests would be filed with the Ministry of Finance by both residents and nonresident taxpayers who believe that actions or decisions of the tax authorities (both Ukrainian and foreign) have resulted or will result in taxation not in accordance with the relevant tax treaty.

Temporary VAT holiday (until the end of 2021) for export of soybean and rape was abolished. Therefore, traders of these crops are eligible for 0% VAT export rate application, which gives them the opportunity to recover VAT credit accumulated from the purchase of these goods.

Controlled foreign companies

CFC rules that tax undistributed profits of CFCs at the level of the resident owner would be introduced (controlling shareholder) (whether an individual or a legal person). A CFC would be defined broadly to include corporate entities, as well as certain transparent entities (e.g., trusts, investment funds, and other arrangements without a separate corporate legal personality) if those entities are used to circumvent disclosure of control over a foreign legal entity.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

In Ukrainian Hryvnias and in thousands

CFC's income would be taxable, unless any exemptions could be applied. If a Ukraine resident controlling shareholder meets the minimum control threshold, income would be attributed to that shareholder. The amount of income to be attributed to each controlling shareholder would be calculated by reference to both their proportion of ownership and their actual period of ownership or control over the CFC. For CFC taxation purposes, the reporting period would be a calendar year or other fiscal year as the CFC may apply for financial reporting in the jurisdiction of tax residence. The taxable income of each CFC would be included in the annual income of a controlling shareholder for income tax purposes and reported in the annual tax return.

An 18% tax would apply on the undistributed income of a CFC calculated under the applicable tax laws. Distributed income of a CFC could be subject to an 18% or 9% rate depending on the period of distribution. The lower 9% rate would apply if CFC income is distributed by CFC to the resident controlling shareholder as dividends, provided that distribution is made by CFC before filing of the CFC report in Ukraine or by the end of the second calendar year that follows the reporting year. 18% rate would apply if distribution is made later.

The new CFC rules will be introduced in phases starting from 2021.

Other changes in 2019 calendar year

The limit on repatriation of dividends is abolished. The National Bank of Ukraine has approved the resolution which abolishes the limit on repatriation of dividends. Hence, a foreign investor is allowed to repatriate foreign-currency dividends in any amount (the last limit approved during Q2 2019 constituted EUR 12 million per month). The resolution came into force starting from 10 July 2019.

Management believes that the Group has been in compliance with all requirements of the effective tax legislation and currently is assessing the possible impact of the introduced amendments.

The Group is subject to legal actions and complaints in its ordinary course of business. Management believes that it is unlikely that a significant settlement or loss of assets will arise out of actions and complaints and no respective provision is required in the consolidated financial statements of the Group as at 31 December 2019. As of 31 December 2018 the Group's management assessed its maximum exposure to tax risks related to deductibility of certain expenses for corporate income tax purposes for total amount of UAH 55,958 thousand.

Legal issues

The Group is involved in litigations and other claims that are in the ordinary course of its business activities. Management believes that the resolution of such matters will not have a material impact on its consolidated financial position or consolidated operating results.

Operating lease commitments

As of reporting dates, the Group as a lessee had the following outstanding commitments under non-cancellable operating lease agreements:

	31 December 2018
Due within one year Due from one to five years Due thereafter	82,594 326,694 182,106
Total	591,394

As at 31 December 2019, the Group did not have significant non-cancellable operating lease commitments.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

In Ukrainian Hryvnias and in thousands

Commitments on acquisition of property, plant and equipment and construction services

During the years ended 31 December 2019 and 2018, the Group entered into the agreements on acquisition of property, plant and equipment and construction services to develop its own production facilities. As of 31 December 2019 and 2018, the Group's liabilities on such commitments amounted to UAH 54,930 thousand and UAH 120,333 thousand, respectively.

18. RELATED PARTY TRANSACTIONS

In accordance with IAS 24 *Related Party Disclosures*, parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions. In considering each possible related party relationship, attention is directed to the substance of the relationship, not merely the legal form.

Related parties include the immediate participant, the ultimate owner, close relatives of the ultimate owner, entities under joint control and significant influence of the ultimate owner, entities under common control of the ultimate owner and key management personnel.

Transactions with the entities under common control of the ultimate owner for the years ended 31 December 2019 and 2018 were as follows:

Nature of transactions	201	L 9	201	.8
	Related parties transactions	Total turnover	Related parties transactions	Total turnover

19. FINANCIAL RISK MANAGEMENT

Capital risk management

The Group manages its capital to ensure that it will be able to continue as a going concern while maximizing the return to the participant through the optimization of the debt and equity balance. Management of the Group reviews the capital structure on a regular basis and takes steps to balance its overall capital structure through the attraction of new debt and increase of issued capital to keep net debt to equity ratio at an acceptable level.

Major categories of financial instruments

The Group's principal financial liabilities comprise borrowings, lease liabilities, trade accounts payable and other current liabilities. The main purpose of these financial instruments is to raise finance for the Group's operations. The Group has various financial assets, such as trade accounts receivable, interest-free loans issued, short-term deposits, cash and cash equivalents and other current assets.

	31 December 2019	31 December 2018
Financial assets		
Cash and cash equivalents Trade accounts receivable Interest-free loans issued	13,547 40,548 3,077	64,054 50,437 4,162
Total financial assets	57,172	118,653
Financial liabilities		
Lease liabilities Borrowings Trade accounts payable Other current liabilities	358,031 173,390 64,195 55,891	263,489 32,464 65,175
Total financial liabilities	651,507	361,128

The main risks arising from the Group's financial instruments are credit, liquidity and foreign currency risks. As all Group's borrowings are at fixed rates, the Group has no exposure to interest rate risk.

Credit risk

The Group is exposed to credit risk, which is the risk that one party to a financial instrument will fail to discharge its obligations and cause the other party to incur financial losses.

The Group generates revenues mainly from providing cargo transshipment services. The Group structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to each customer.

The Group's five largest debtors as of 31 December 2019 and 2018 had outstanding balances of trade accounts receivable of UAH 38,591 thousand and UAH 45,464 thousand, respectively, representing 95% and 90% of total balance of trade accounts receivable as of those dates. The approved credit period for most debtors is set up at 30 days.

Carrying amounts of financial assets represent a maximum exposure to credit risk.

Liquidity risk

Liquidity risk is the risk that the Group will not be able to settle all liabilities when they become due. As shown in the consolidated financial statements, as of 31 December 2019 and 2018, the Group's current liabilities exceeded its current assets by UAH 243,692 thousand and UAH 238,886 thousand, respectively. The Group's liquidity position is carefully monitored and managed. The Group has in place a detailed budgeting and cash forecasting process to help ensure that it has adequate cash available to meet its payment obligations. The Group manages liquidity risk by maintaining adequate reserves and cash on bank accounts, by continuously monitoring forecast and actual cash flows. The Group's management performs monitoring of the turnover of purchases limits to manage Group's liquidity.

Trade accounts payable represent amounts payable for supply of services. The average credit period on purchase of majority of services is 60 days. No interest is charged on the outstanding balance of trade accounts payable during credit period.

The following table details the Group's remaining contractual maturity for its financial liabilities as of 31 December 2019. The table has been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Group can be required to pay.

	Up to 3 months	3-12 months	More than one year	Total
Lease liabilities	23,125	69,374	461,585	554,084
Borrowings	87,427	39,233	68,310	194,970

Foreign currency risk

Currency risk is the risk that the financial results of the Group will be adversely impacted by changes in exchange rates to which the Group is exposed. The Group has significant borrowings in foreign currencies. The Group has not entered into transactions designed to hedge its foreign currency risk. At the same time, management of the Group is trying to mitigate the risk by setting limits on the level of exposure by currencies to the existing borrowings.

	USD		EUR	
	31 December 2019	31 December 2018	31 December 2019	31 December 2018
